

DESCRIPTION

- **LubeRite MO 13P** is a mineral based cutting oil specially formulated to provide superior performance for a wide range of metal removal operations.

APPLICATION

- The product is designed for steel materials specially for heavy duty applications like boring, deep hole drilling, grinding, honing, threading and other heavy duty applications.

FEATURES AND BENEFITS

- Excellent wetting properties that is substantial for longer wheel life and more consistent operations.

- Generates low mist during operation.
- It is transparent, providing good visibility during the metalworking operation.
- Prolongs tool life, as well as providing good chip removal rates.
- Does not contain Chlorine thus the product is safe to use.

AVAILABLE PACKAGES

- 200-liter drum
- 20-liter pail

TYPICAL CHARACTERISTICS

Appearance	Yellow Liquid
Viscosity at 40°C, cSt	13-15
at 100°C, cSt	3.5
Saponification No., mgKOH/g	5
Sulfur, % by wt	3.0
Flash Point, °C	180
Specific Gravity, at 15°C	0.86
